Overview

Texas Education Code (TEC), §29.1544 requires the Texas Education Agency (TEA) to, not later than August 1 of each year, prepare and submit a report to the legislature based on the information collected from each school district that offers a prekindergarten program and each private entity that provides a prekindergarten program under contract with a school district for each prekindergarten class offered by the district or private entity. The following information must be collected:

- The number of students in each prekindergarten class
- The number of certified teachers in each prekindergarten class
- The number of teacher's aides in each prekindergarten class
- Whether each prekindergarten class is full-day or half-day
- If the district offers half-day classes, whether the district offers two half-day classes per day

From the information submitted by school districts and contracted private entities, TEA must determine the total number of teachers and teacher's aides in prekindergarten classes in Texas. From the information submitted TEA must also calculate student/teacher ratios that includes both teachers and teacher's aides in the calculation.

For purposes of calculating the student/teacher ratio for each prekindergarten class offered by a school district or private entity that provides a prekindergarten program under contract with a school district, **each teacher or teacher's aide was counted**

- once for a full-day class; and
- twice for a half-day class if the district offers two half-day classes per day.

This report includes the total number of teachers and teacher's aides in prekindergarten classes in Texas and ratios that were calculated from that information, the business rules used to conduct the calculations, and the current challenges associated with obtaining accurate ratio values.

Ratio Data

The student to teacher ratio data is reported by program type (full day, half day (AM), and half day (PM)). The highest ratio reported (number of students to teachers) is seen in full-day programs, with an average of 17.56 students to one teacher. Half-day AM programs report an average ratio of 15.89 students to one teacher, and half-day PM programs report an average ratio of 17.22 students to one teacher. The full data set can be found in Appendix 3.

2019-2020 Ratio Data			
	Full Day	Half Day (AM)	Half Day (PM)
Student-to-Teacher Ratio*	17.6 : 1	15.9 : 1	17.2 : 1
Total Students	158,446	58,001	48,965
Total Teachers	9,596	3,923	3,075
Total Teacher's Aides	3,540	1,336	919

***Please see business rules below for the actual calculation of student-to-teacher ratios.**

Business Rules for Determining Ratios

The Early Childhood Data System (ECDS) does not directly collect ratio data for each prekindergarten classroom within a program. As such, a series of business rules were developed to leverage available data fields to estimate ratios. While all business rules for determining ratios are located in Appendix 2, the most critical rules for conducting these calculations are outlined below.

Calculation rules for INSTR_STAFF_CNT and PK_AIDE_CNT

The Instructional Staff Count business rule asks that the “Teacher of Record” (state-certified classroom teacher) be determined by counting each per class. In addition,

If all Teachers of Record for a class have the same Assign Begin Date (ASSIGN_BEGIN_DATE) and Assign End Date (ASSIGN_END_DATE) then each teacher is to be included in the class count, otherwise only one teacher would count for that class. For example, if there was any overlap throughout the year, and two Teachers of Record were present in the same classroom for different amounts of time, their presence as two Teachers of Record would not be present in this ratio count, and the calculation would only count one Teacher of Record

*Please note, this same rule applies to Teacher Aides, see *PK_AIDE_CNT*

Calculation rules for Student-to-Teacher Ratio by class

The Student-to-Teacher Ratio by class was determined by combining Teacher of Record counts with Teacher Aide counts (INSTR_STAFF_CNT + PK_AIDE_ASSIGN_CNT). However, in incidences of an aide working in the same interval in different classrooms (two hours per day per different classroom, for example), the Teacher Aide would only be assigned to one of the classrooms within the same school that share this aide. Therefore, if three classes shared the same teacher aide, and each class also had its own Teacher of Record, the aide would only be counted once toward the ratio of one class, as they are not serving a full day in any one class, but rather multiple hours in multiple classrooms.

Challenges in Getting Accurate Ratio Data

Student-to-teacher ratios are difficult to calculate due to limitations of the data system and the fluid nature of the prekindergarten classroom environment.

While the business rules were carefully crafted to maximize the accuracy of the resulting report, capturing truly accurate ratios is impossible. Below are some decisions and assumptions made in the calculation process that could impact the accuracy of the final ratio report.

- Teachers who overlap entirely (exact same start and end dates) are each counted, otherwise only one is counted.
 - This means that a second teacher could have started working in a class later in the school year, but that would not be reflected in the ratio calculations.
- Teacher Aides are assigned to only one class, even though they may work in multiple classes during the same school year.
 - This means that while these aides spent a portion of their time in multiple classes, for example, two hours in each classroom, the time they spent in each classroom improving the student to teacher ratio would not be reflected in this report. Instead, their time would only count toward a full day in one classroom.

The ability of the aforementioned rules to generate accurate calculations is also impacted by the following early childhood education-specific factors:

- Teacher aides and/or teachers of record who move from one class to another based on daily attendance needs
- Regular teacher of record and teacher aide employment turnover, creates difficulties in identifying how many teaching professionals are in a classroom at any given time or on average over the course of a school year
 - This issue results in low staff counts that can ultimately lead to children frequently being re-assigned to different classrooms with more teachers present
- Changes in student enrollment as prekindergarten attendance is not mandatory

Summary

Maintaining a low student-to-teacher ratio in prekindergarten classrooms is a key element of providing a high-quality program (as evidenced by its inclusions as a high-quality prekindergarten component in state statute). There are numerous inherent challenges in accurately calculating these ratios. As such, it is vital that the data collection system, processes, and trainings continue to evolve to address those challenges as much as possible. Improved accuracy in determining student-to-teacher ratios will provide more meaningful and actionable data to educators and policymakers.

APPENDIX 1

Texas Education Code

Section 29.1544. REPORTING OF CERTAIN INFORMATION REGARDING PREKINDERGARTEN PROGRAMS; AGENCY REPORT.

- (a) The agency by rule shall require each school district that offers a prekindergarten program under Section [29.153](#) and each private entity that provides a prekindergarten program under contract with a school district to report the following information in the form and manner prescribed by the agency for each prekindergarten class offered by the district or private entity:
 - (1) the number of students in each prekindergarten class;
 - (2) the number of certified teachers in each prekindergarten class;
 - (3) the number of teacher's aides in each prekindergarten class;
 - (4) whether each prekindergarten class is full-day or half-day; and
 - (5) if the district offers half-day classes, whether the district offers two half-day classes per day.

- (b) From the information submitted under Subsection (a), the agency shall determine the total number of teachers and teacher's aides in prekindergarten classes in this state.

- (c) From the information submitted under Subsection (a) and for purposes of calculating the student/teacher ratio for each prekindergarten class offered by a school district or private entity that provides a prekindergarten program under contract with a school district, the agency shall count each teacher or teacher's aide:
 - (1) once for a full-day class; and
 - (2) twice for a half-day class if the district offers two half-day classes per day.

- (d) Not later than August 1 of each year, the agency shall prepare and submit a report to the legislature based on the information collected under Subsection (a).

APPENDIX 2

Business Rules for HB 3 PK Student-to-Teacher Ratio Calculation

The business rules used to create the HB3 prekindergarten student-to-teacher ratio report are as follows:

1. Include only classes (based on CLASS_ID) that have both students and staff
 - a. PK student data
 - i. Data source: SCH_CC_ECDS.V_TPEIR_STUDENT_SECTION
 - ii. Choose HOME_ROOM_FLAG '1' for student records
 - Choose the CLASS_IDs where at least one student has the HOME_ROOM_FLAG '1'. When a CLASS_ID is chosen, all students should be counted in determining the class size.
 - In cases such like a district/school did not submit their PK assessment data successfully or a school did not have any PK students taking the assessment or perhaps some other scenarios, none of the PK students will have the HOME_ROOM_FLAG set to '1' as it's currently tied to the student's PK assessment status. Hence, for district/school in this situation, TPEIR will provide these districts/schools in a separate dataset (or a separate tab in an Excel workbook) that include all CLASS_IDs within their corresponding district/school to ECE, and ECE will then determine how they want to put it in their final report.
 - ii. No limit on PK student age
 - b. PK staff data
 - i. Data source: SCH_CC_ECDS.V_TPEIR_STAFF_SECTION
 - ii. Choose STAFF_CLASS_CODE '01', '02', '04' for staff records
 - STAFF_CLASS_CODE '01': Teacher of Record
 - STAFF_CLASS_CODE '02': Assistant Teacher
 - STAFF_CLASS_CODE '04': PK Classroom Aide
 - c. All districts with DIST_TYPE_CODE: A, L, R
 - d. STU_GRADE_LVL = 'PK'
2. Calculation rules for INSTR_STAFF_CNT and PK_AIDE_CNT
 - a. Select one role (based on STAFF_CLASS_CODE '01', '02' and '04') per staff per class based on longest duration
 - i. First determine the duration: MAX(ASSIGN_END_DATE - ASSIGN_BEGIN_DATE)
 - ii. Then determine the role of a staff by CLASS_ID when there is a tie in terms of the duration: MIN(STAFF_CLASS_CODE)
 - b. INSTR_STAFF_CNT
 - i. Selects Teacher of Record ('01') based on the role determined from 2a and count them per class
 - If all teachers for a class have the same ASSIGN_BEGIN_DATE and ASSIGN_END_DATE then include each teacher in the count
 - else count one teacher for the class.

- ii. Selects Assistant Teacher ('02') based on the role determined from 2a and count them per class
 - If all teachers for a class have the same ASSIGN_BEGIN_DATE and ASSIGN_END_DATE then include each teacher in the count
 - else count one teacher for the class.
 - iii. Adds count of Teacher of Record ('01') from 2.b.i and count of Assistant Teacher ('02') from 2.b.ii together
 - c. PK_AIDE_CNT
 - i. Select PK Classroom Aide ('04') based on the role determined from 2a
 - ii. Create counts of PK Aide per class
 - If all PK Aides for a class have the same ASSIGN_BEGIN_DATE and ASSIGN_END_DATE then include each PK Aide in the count
 - else count one PK Aide for the class.
 - iii. A PK Aide can work in multiple classes in the same time interval, meaning each class may get only a portion of a PK Aide's time
 - After talking to Howard, he said we can count the PK Aide once for each CLASS_ID which the PK Aide worked
3. Calculation rules for Student-to-Teacher Ratio by class
 - a. Using the AGG.F_PREK_CLASS table, Student-to-Teacher Ratio = $\text{STU_ALL_AGES_CNT} / (\text{INSTR_STAFF_CNT} + \text{PK_AIDE_ASSIGN_CNT} *)$ per class
 - b. * Note for 3a: While PK_AIDE_CNT will have the PK Aide counted for all classes which this PK Aide worked in the same interval, the PK_AIDE_ASSIGN_CNT will only assign this PK Aide to one of the classes within the same school that share this PK Aide.
 - i. The MIN(CLASS_ID) of the same school will have the PK Aide assigned.
 - ii. Using this example – assuming 3 classes share the same PK Aide and each class has its own Teacher of Record (TOR). The denominator of the student/teacher ratio will be:
 - 1 TOR + 1 Aide =2 for one class, and 1 TOR = 1 for the other two classes
 - The MIN(CLASS_ID) among these 3 classes will have this PK Aide assigned. The other two classes will only have the TOR included when calculating the Student-to-Teacher Ratio.
4. The following columns will be provided:
 - SCHL_YEAR
 - SCHL_YEAR_DESC
 - DIST_CODE
 - DIST_NAME
 - SCHL_CODE
 - SCHL_NAME
 - PREK_SERV_ID
 - PREK_CLASS_ID
 - PUBLIC_PK_STU_INSTR_CODE
 - PUBLIC_PK_STU_INSTR_DESC
 - CLASS_SIZE (All Age Student Count)
 - INSTR_STAFF_CNT (Teacher Count)

- PK_AIDE_CNT (PK Aide Count)
- PK_AIDE_ASSIGN_CNT (Assigned PK Aide Count)
- STU_TCHR_RATIO (:1)

5. Masking Rules:

- a. Need to mask small numbers (between 1 and 4) for CLASS_SIZE
- b. When CLASS_SIZE is masked, mask STU_TCHR_RATIO (:1) as well
- c. Display asterisk (*) for masked numbers
- d. Only need the 1st level masking
